

Hornchurch Trumps

THE CARD GAME

THE RULES

A game for two or more players.

The idea of the game is to win all of the cards in the pack.

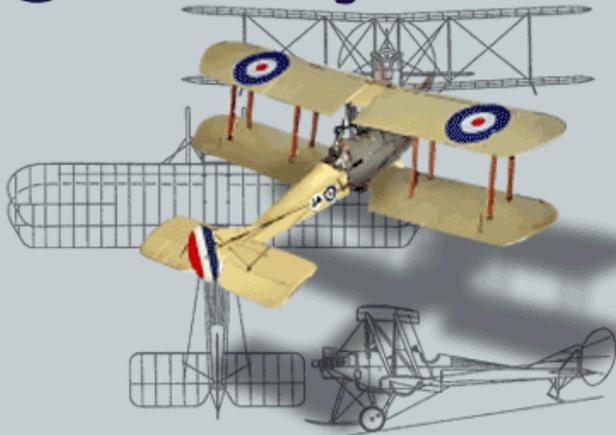

At the start of the game, all of the cards are dealt out equally. The cards are held face up and the player to the dealers left begins play. The cards contain certain facts and figures such as speed, maximum altitude, bomb load.

The starting player reads out one of the values on their topmost card. The other players do likewise and whoever has the highest figure wins.

These cards are then taken by the winner and placed at the bottom of their pack and then it is their turn to call the next figure/fact. In the case of a draw, all the cards are placed in the centre and a new category is chosen from the next card by the same person as in the previous round. The winner of that round obtains all of the cards in the centre as well as the top card from each player as usual.

Players are eliminated when they lose their last card, and the winner is the player who obtains the whole pack.
